

NURESSE LACTSTART TOPDRESS

What it is:

Nuresse LactStart is a unique topdress, designed for the transition period (5 days pre- and 3 days post farrowing). This TopDress contains a blend of liver stimulating compounds, functional fibre and minerals to enhance liver metabolism and reduce the risk of constipation. Nuresse LactStart Topdress is formulated without protein or fat from animal sources.

Features

Contains a mix of liver stimulating compounds

Contains a natural and functional fiber

Fortified with electrolytes and natural laxative salts

Benefits

- Supports the liver in processing the nutrients faster and make more energy available to the sows
- Promotes a good startup of metabolic functions and milk production
- Enhances appetite and feed intake
- Cleans up a fatty liver
- Creates a bulk-forming laxative for the relief of constipation to ensure a smooth birth process
- Supports a healthy digestive system
- Enhances uptake of energy from the intestinal tract
- Maintain a healthy pH balance of the gut
- Stimulates Ca and P metabolism to avoid milk-fever like problems
- Makes more Ca available to the sow which improves contractions of muscles surrounding the uterus and reduces the stillborn rate
- Increased stool bulk and softness to avoid constipation
