

# Utmost™

## GAIN OPTIMIX Grow-Finish Diets

### What it is:

**Purina's Utmost™ Gain Optimix is a protein supplement perfect for mixing with your own on-farm energy sources. Incorporating the latest amino acid ratio technology, Utmost Gain Optimix is pelleted for consistency and uses quality ingredients with high nutrient specifications to cost effectively deliver the highest returns per pig.**

### Features

#### NEW

Enhanced Amino Acid levels and ratios as the pig grows to finishing

Replaces grain-based commodities

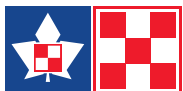

Pelleted product

Porc Tech performance standards

Optimal nutrients for all stages of production

### Benefits

- Enhances growth and carcass characteristics including index, loin depth and lean yield.
- Optimizes feed conversion to lower feed cost per pig.
- Purina's ingredient monitoring process ensures use of quality ingredients in feed.
- Improves mixing consistency and flow.
- Reduces dust in the barn.
- Improves intake
- Established performance targets based on farm specific feed intake and genetics allows you to determine the optimal feeding strategy.
- Convenience and flexibility on-farm.
- Use one product with the addition of only corn on-farm.
